8. Settings (clear cache, check update, logout)

Home

The mining button

Social media handles

Countdown to next mining session

Your hashrate at the moment

Numbers of invitees (4/9) and numbers that are currently mining

After they have clicked on the mining button there is still an opportunity to earn more daily which is claiming 5 doges(just like claiming nft, the doges will be used for KYC and purchasing of NFT, there will be a button that says claim doges(image of a dog head like doge coin). And per doge claim there will be a 30 sec ads which is where our first revenue will come from. Now on a norms the claim is optional, it's for only those who needs it.

Your Team

Numbers of referrals with their username, date of joining and either they are online or offline.

Invite friends button

Referral bonus calculations (Formula: no of referral online x 0.01= 0(annex/s))

Ping inactive members

Wallet

Balance of mined Annex coins

Balance of the accumulated doges head(also like a reminder that u need to claim before it's too late)

Transaction history for daily mined Annex coins.

Send button to send coins from one wallet to another via username then for them to send to Annex exchange it will be via email.

They can't send or receive doges head it's only claimable by watching Ads.

Receive button to receive Annex mined coins from one wallet only via Username. The email is only to send to exchange that's the difference.

KYC Verification

Also known as Know Your Customer, is where users details will be required before they can send and receive (wallet 2 wallet) and also before they can be able to send to exchanges(Annex Exchange).

The purpose is because some people can clone the app and mine more than once daily on the same phone and then send to the main mining account, but if KYC is done and required before they can perform such transaction, then it'll help reduce the numbers of fraud because what's the use of cloning the app when u can't use the same document to do KYC, meaning the coin can't leave that app.

Valid means of identification(international passport, generally accepted ID in your country)

Email this is where we will ask for it, because it'll be used for transferring your coin to the exchange.

Face verification(linking softwares like sumsub, jumio, Veriff, Berbix etc).

Statistics

On this page we'll be listing in details the data of Annex coin.

Annex Price - ?

Total Users register – 200m

Total supply(amount of coin created) – 100m

Total mined coins – 10m

Top 5 highest countries mining Annex coin with the amount of miners:

Nigeria: 50m

USA: 38M

China:35m
